Task 5

The family is not just a word it is the most important part of our lives. To talk about mine, my family contains of eight people: parent, grandparents, 3 siblings, and me. I would like to compare three of them by their generation and describe.

Firstly, my dad. He is like a boss ^{such} in the office as in the house. His word is the rule for us, (My father) However, he is the kindest person whom I know. My father's name is Arman, and recently he became ~~an~~ a middle aged person. Even though he is pretty old, we can discuss any topic and usually watch Netflix TV series together.

Secondly, my grandpa. Grandfather is the typical elder. He is ill sometimes, so most of the time we take care of him and his health. Both of my grandparents love to sleep. For example, today they fell asleep in the living room, while they were watching TV.

Third, and the last for today is my sibling. I have two sisters and little brother. Now I will talk about my second one. She is 20 years old, but mentally it feels like she is ~~20~~ much older. You can ask me why. Although she grew up in the same conditions as every teenager did, she studied much harder to improve herself. Nowadays, my sister is studying for free in Italy, Venice. I take her lifestyle as an example for my future, and adore it.

To conclude, I would say that our family don't like the way most of our country's population does. We don't have any stereotypes.
