-All of us ever imagined our future, how we'll live in 2030-2040 y. In my opinion this thoughts can help us to set goal/target and we will be closer and closer for our dreams. I believe that we will be able to do this and our dreams will become truth.

I want to be architector in the future. I decided this way myself then my parents supported me in my choice. I hope that my choice is will help me. I imagine my breame house like the best architecture in my country or in the world. I want to build the house as beautiful as university "politecnico di Milano". (I want to study there) I like building like that and I want my dream house outside like this university's style. Maybe my choice will change because I love ancient and modern styles. In my opinion both styles are great, but ancient style is better for me. My dream house has no special rooms because it isn't important. Maybe pool and aqua park for my child/children is good idea. SO, this house is not for me, ^{firstly} I want it for my family. Most important things in the house are frequently cleaning and its beautiful architecture. It is my dream house and I believe that I will do it and my family will live comfortable.
